Details of Twin Cable Top Slider

UHMW Sliders
The UHMW Sliders wipe the top rail clean with every cycle. The smooth square base reduces friction and makes cranking easier. Guaranteed to never wear out. Part # 502-0304

Removable Bows
The tarp does not need to be removed should a bow need replacement. Just loosen the cable, remove the bolt on the slider and the bow slides out of the tarp pocket. Part # 495-9DX

One Piece Tarp
All tarps are made from one continuous piece of fabric with no welds or seams. Part # 427-XXXX

Aerodynamic Tarp
The front of the tarp can be tapered with the front bow height lower than the other bows. This makes the system more aerodynamic and can actually improve fuel economy. Part # 303-9955

Pulltarps® Front to Back Cable Systems

Details Make the Difference

Air Gates Bows (Optional)
High lift air gate bows for trailers with air gates.

Easy Cable Tensioning
Each cable can be tensioned separately. Adjusting bolts are facing forward out of harms way.

Hold Down Hooks
When the tarp is extended the hold down hooks keep the tarp secured from wind.

Direct Drive Hand Crank Assembly
The direct drive long handle is great for shorter applications.

Upper Gear Reduction Hand Crank
Gear reduction makes longer or heavier tarps easier to crank.

Bolt-On Back Flap
The Bolt-on back flap can be easily replaced in the field if necessary. Part # 495-9DX

Standard Chain Drive
Easy to crank at ground level. The handle folds out of the way for easy storage.

Basic Hand Crank
Interchangeable with other brands.

Electric Motor Drive
The powerful 1.1hp Superwinch® motor drive can be operated by wireless remote control, in-cab switch or external switch.

Pulltarps® Front to Back Cable Systems

All Drive Options can be easily interchanged and upgraded!
